

# 4-PIN ADAPTER LOCK QUICK START GUIDE

Keep Your Power Adapter From Coming Unplugged

1. Locate the 4-pin power port.

2. Hold the 4-pin power adapter to the port.

The power adapter lock system is a two part mechanism. It is made up of a power adapter plug and an outside housing that secures the plug into place.

3. Pull back on the outside housing.

4. Push the power adaptor plug, while pulling back on the outside housing, into the power port until it stops. Release the outside housing to lock into place.
