

XVIEW PROFESSIONAL

Mid Range Client Viewing

One of the most versatile client viewing stations of the market today, the Seneca xView Professional is designed with multiple features. With the ability to fit in a smaller installation environment, the xView Professional comes as a micro tower configuration for desktop placement or other small footprint space. This dynamic client viewing station can handle up to four monitors and is engineered to support mid-range surveillance projects.

The 8th generation Intel® Core™ processor family delivers a new class of computing with a host of new features to power this appliance. The built-in Intel® Hyper-Threading Technology allows each processor core to work on two tasks at the same time for smoother multitasking while integrated graphics delivers stunning 3D visuals and will handle a wide range of video content.

We understand the high demands of a viewing solution, so our xView Professional appliance has been thoroughly tested with the leading video management software (VMS) platforms. Optimized for each VMS and the surveillance market, integrators can rest assured the xView Professional will have exceptional performance for multiple monitor viewing.

KEY FEATURES

- Ability to handle up to 4 monitors for mid-range viewing solutions
- Intel® 8th generation Processors for improved multi-tasking and responsiveness
- Windows 10 IOT Enterprise delivers enterprise manageability and security to IoT solutions
- GPU Accelerated Decode displays more high-resolution streams from a single workstation, as well as enhancing video playback performance
- Performance tunings optimized for specific VMS
- Test, validated and certified with top VMS applications
- 3 Year Global next day onsite service

*{ Ideal for mid-range client multiple
monitor viewing solutions }*
